

ANIMESH SAHOO

Software Developer | AI/ML Engineer | Python Developer

Tamluk, West Bengal | +91 8250986973 | animeshsahoo451@gmail.com
LinkedIn - [linkedin.com/in/animesh-sahoo-b03151302](https://www.linkedin.com/in/animesh-sahoo-b03151302) | GitHub - github.com/animesh6532

PROFESSIONAL SUMMARY

Computer Science (AI & ML) undergraduate with hands-on experience in Software Development, Machine Learning, Backend Development, and AI-powered applications. Skilled in Python, Java, SQL, Machine Learning, Data Structures & Algorithms, REST APIs, and Database Management Systems. Developed AI-based interview platforms, fraud detection systems, and financial analytics solutions. Passionate about building scalable software and intelligent systems.

TECHNICAL SKILLS

Programming Languages: Python, Java (OOP), SQL, C
Software Development: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Problem Solving, Debugging
Machine Learning & AI: Machine Learning, Classification, Regression, Feature Engineering, Model Evaluation
Data Science & Analytics: Pandas, NumPy, Matplotlib, Data Analysis, Data Visualization
Frameworks & Libraries: Scikit-learn, Jupyter Notebook
Databases: MySQL, PostgreSQL
Tools & Platforms: Git, GitHub, Google Colab, VS Code
Cloud (Basics): AWS, Google Cloud Platform (GCP)

SOFT SKILLS

Problem Solving • Analytical Thinking • Communication • Team Collaboration • Adaptability

PROJECTS

NeuroPath AI (github.com/animesh6532/NeuroPath)

- Developed an AI-powered interview preparation and career guidance platform.
- Designed and implemented 10+ interview workflow features to streamline candidate preparation and evaluation.
- Integrated frontend, backend, and AI components, reducing manual interview preparation effort by 50%.

StartupForge AI (github.com/animesh6532/StartUp_Forge_AI)

- Built a multi-agent AI system for startup evaluation and strategic decision-making.
- Orchestrated specialized AI agents using LangGraph to generate structured business outputs.
- Automated market research, financial planning, and investor documentation generation.

NexTwin AI – Edge-Powered Industrial Digital Twin Platform (github.com/animesh6532/NexTwinAI)

- Engineered a smart manufacturing platform using Python, FastAPI, React, and Machine Learning for real-time industrial intelligence.
- Developed Predictive Maintenance, Anomaly Detection, and Energy Optimization modules.
- Integrated AI Copilot and real-time analytics for smart factory monitoring.

INTERNSHIP

Artificial Intelligence & Machine Learning Intern (Kodacy × SPACE (Virtual)) | Feb 2026 – Mar 2026 :

- Designed a stock price prediction model using Python and Scikit-learn, analyzing 5+ years of historical market data.
- Processed and analyzed 1,000+ stock market records using Pandas and NumPy.

Data Analytics Intern | Bluestock Fintech | May 2026 - Present :

- Developed financial analytics solutions using PostgreSQL, Django, Power BI, and Machine Learning for NIFTY100 and mutual fund analytics projects.
- Analyzed and validated financial datasets, performed database operations, and generated dashboards and automated reports.
- Generated actionable business insights through financial analytics, anomaly detection, and reporting solutions.

EDUCATION

B.Tech — Brainware University - Computer Science (AI & ML) | 2023 – 2027

Class XII — WBCHSE, Gobindapur High School | 2023 | 79.58%

Class X — WBBSE, Sonapetya High School | 2021 | 83.71%

CERTIFICATIONS

- Artificial Intelligence — Samsung Innovation Campus
- Generative AI — IBM SkillsBuild
- Python for Data Science — IBM SkillsBuild
- AWS Migration — AWS & Simplilearn
- Bootcamp on Big Data & Data Science — NIELIT Kolkata

HACKATHONS & COMPETITIONS

- Nexathon — Inter-college Hackathon
- Unstop — Technical Challenges and Hackathons
- Smart India Hackathon (SIH) — National Innovation Competition
